

Merlin Jeyakumar Ebinezar

Senior Android Engineer | Kotlin | Android SDK | Jetpack Compose | FinTech

Abu Dhabi, UAE | **Immediate Joiner** | +971 563251904 | mj.jeyk@gmail.com | jeyk.dev/#work

PROFESSIONAL SUMMARY

Senior Android Engineer with 9 years of experience building secure, customer-facing Android applications for digital banking, fintech and consumer products. Works closely with product, design, backend, and QA teams to take features from early prototypes through release and continuous improvement. Hands-on work spans Kotlin, Java, Jetpack Compose, modular Clean Architecture, and Android solutions for phones, camera/ML workflows.

CORE SKILLS

Android: Kotlin, Java, Android SDK, Jetpack Compose, XML, Material Design, Coroutines, Flow, RxJava, WorkManager

Architecture: MVVM, MVI, Clean Architecture, multi-module design, SOLID, reusable UI components, state management

Product & UX: Figma collaboration, wireframes/mockups, feature prototyping, interaction iteration, visual consistency, design-to-release delivery

Networking & Data: Retrofit, OkHttp, REST, GraphQL, WebSocket, Room, SQLite, DataStore, Firebase

DI & Testing: Dagger 2, Hilt, JUnit, Mockito, Espresso, Compose UI testing, regression testing, test-driven development (TDD) familiarity

Security & Delivery: OAuth 2.0, JWT/JWS, Android Keystore, SSL pinning, AES, biometrics, DexGuard, AppDome, Gradle, Bazel, Jenkins, CI/CD, Git

Monitoring & Teamwork: Crashlytics, Analytics, Performance Monitoring, Remote Config, SonarQube, Jira, Agile/Scrum, code reviews, mentoring

PROFESSIONAL EXPERIENCE

Synechron Technologies LLC - Senior Android Developer

Dubai / Abu Dhabi, UAE | Sep 2024 - Jun 2026 | Client: Abu Dhabi Islamic Bank (ADIB)

- Delivered and supported secure customer-facing Android banking features, translating product, compliance, and business requirements into reliable flows across implementation, release validation, and production support.
- Partnered with product owners, UI/UX, backend, QA, and client stakeholders to refine workflows, review UI behaviour, triage issues, and coordinate releases in a fast-paced squad.
- Implemented and remediated eSIM purchase/install, KYC refresh, EIDA/EFR scanning, transfer validations, and bilingual location-based offers, with careful handling of security and edge cases.
- Strengthened release reliability through Gradle and DexGuard updates, Bazel/TOML build modernisation, Jenkins mapping uploads, Crashlytics environment setup, and root-cause analysis of production issues.
- Applied OAuth 2.0, Android Keystore, SSL pinning, secure storage, biometrics, and feature-toggle patterns while supporting code quality and engineering guidance within the team.

Robosoft Technologies - Lead Android Developer

Karnataka, India | Nov 2022 - Jan 2024 | Project: ETV Win OTT Streaming Platform

- Collaborated with product, design, backend, and QA to shape onboarding, subscription, playback, and account experiences from design handoff and UI iteration through implementation and release.
- Refactored legacy features into a multi-module MVVM architecture, reducing feature integration time by approximately 35% and creating 10+ reusable components with consistent UI/domain/data separation.
- Built Kotlin/Java media features with ExoPlayer, HLS/DRM, Chromecast, subscriptions, Coroutines/RxJava, Retrofit, Dagger, and Firebase.
- Improved production visibility with Analytics, Remote Config, Performance Monitoring, and Crashlytics, helping reduce issue-resolution time by approximately 40%.
- Managed CI/CD, automated checks, regression testing, release validation, and production support for frequent customer-facing releases.

PROFESSIONAL EXPERIENCE

OptiSol Business Solutions - Android Developer

Remote | Sep 2020 - Sep 2022 | Pampers Fit Finder, LitPic, Citibank India

- Built Kotlin/MVVM multilingual onboarding and ML Kit-powered fit-detection workflows for Pampers, serving 100,000+ users across Android versions and device sizes.
- Engineered LitPic Android SDK and React Native bridges for camera/video, AR-style filters, gesture-driven interactions, FFmpeg processing, and JavaScript-to-native communication.
- Contributed to Citibank India secure mobile banking features using AppDome Shield, SSL pinning, AES encryption, biometrics, and secure data handling.
- Improved code quality and release confidence through unit/UI testing, CI/CD enhancements, regression validation, and production debugging.
- Built user-facing crypto ticketing and NFT marketplace flows for wallet connection/import, authentication, transaction initiation, confirmation tracking, portfolio management, and notifications.

MithrAI Inc - Android Developer

Madurai, India | Nov 2018 - Jul 2020

- Delivered real-time messaging, SIP/VoIP, and IoT remote-control applications using WebRTC/XMPP, Room, TCP/UDP, BLE/Wi-Fi, Firebase, and performance monitoring.
- Improved message loading and synchronisation while supporting secure media, voice, connected-device, and production-release workflows.
- Developed stock-scanning workflows using Zebra Scanner SDK, offline SQLite storage, REST APIs, and device-specific barcode hardware for reliable warehouse use.

SangVish Technology - Android Developer

Madurai, India | May 2018 - Oct 2018 | Buy2Rental Marketplace and Nuvo Taxi

- Built marketplace and taxi-booking features with real-time GPS tracking, Firebase live updates, fare calculation, payment integrations, and image-loading optimisation of approximately 40%.

Cogzidel Technologies - Android Developer

Madurai, India | Jul 2017 - Mar 2018 | Social and Legal Forum Applications

- Built Firebase-backed social and legal-forum features and reduced synchronisation latency by approximately 30% through offline-first data handling.

SELECTED PRODUCTS & OPEN-SOURCE PROJECTS

- **iDrawing - Independent Android Product:** Took a tracing/drawing app from product idea and UX iteration through Play Store release, implemented camera/gallery import, zoom and brightness controls, image filters, premium/rewarded-ad flows, analytics, Kotlin AWS Lambda APIs, MongoDB, S3, and an admin app. [Google Play](#)
- **Multi-module MVVM Architecture:** Reusable Kotlin architecture template demonstrating modular feature boundaries, Clean Architecture, dependency injection, Coroutines/Flow, testable layers, and scalable delivery. [GitHub](#)
- **Easy Google Authentication:** Reusable Android authentication helper supporting Google APIs across Android API levels 18-35.

EDUCATION, CERTIFICATIONS & RECOGNITION

Education: Bachelors of Computer Science, Madurai Kamaraj University | 2013 - 2016

Certifications: Advanced Android Bootcamp 2024, Kotlin Essential Training, MongoDB Java Developer and data-modelling certifications

Recognition: Top Squad - ADIB Alpha Squad (2024 and 2025), Shield Award - Best Achiever

Languages: English - Professional proficiency | Tamil - Native
